

FAST FACTS: Relaxation

Relaxation is a state or condition of being free from anxiety and muscle tension.

✓ Benefits of Relaxation:

- Relives pain by:
 - Loosening tense muscles
 - Distracting individual from pain and symptoms
 - Decreasing stress
 - Helping to cope

✓ Relaxation Techniques:

- Deep breathing
- Listening to music
- Thinking of peaceful images
- Repeating the same word or phrase over and over
- Meditation

✓ What else the Caregiver should do

- Write down and share information about your loved one's pain with their healthcare provider.
- Consider using a [Pain Diary](#) to note important information useful to your loved one's healthcare provider.
- Encourage your loved one to try this and/or another non-drug treatment and document the impact on their pain in their Pain Diary.
